

Women and HIV Did You Know?

**AROUND ONE IN FOUR
PEOPLE WITH HIV
IS A WOMAN**

**NEW
DIAGNOSES**

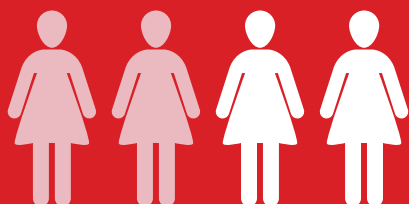

59% **Black/African American***

20% **White**

16% **Hispanic/Latina†**

4% **Other Races/Ethnicities**

**NOT ALL WOMEN
ARE EQUALLY
AFFECTED BY HIV**

**HALF OF THE
WOMEN WITH HIV
HAVE ACHIEVED
VIRAL SUPPRESSION‡**

Get the facts. Get tested. Get treatment.

For more info, go to www.cdc.gov/hiv

* *Black* refers to people having origins in any of the black racial groups of Africa, including immigrants from the Caribbean, and South and Latin America. *African American* is a term often used for Americans of African descent with ancestry in North America. Individuals may self-identify as either, both, or choose another identity altogether.

† Hispanics/Latinas can be of any race.

‡ A person with HIV who takes HIV medicine as prescribed and gets and stays virally suppressed or undetectable can stay healthy and has effectively no risk of transmitting HIV to HIV-negative partners through sex.

Based on the latest data available in February 2019.
